e

ACADEMIC PROJECTS:

Library Management System:

- In this Library Management System project, you can enter the record of new books and retrieve the details of books available in the library.
- We can issue the books to the students and maintain their records. Late fine is charged for students who returns the issued books after the due date.
- Only one book is issued to students. New book is not issued to students those not returned the last book

Online Result Portal:

- In this online Result portal project, you can manage student data & their results.
- Here we aimed to design online web application for issuing the exam results of students, this is named as Online Exam Result System. Online Report Card generation will be easy for students. They just need to enter their roll no. or enrolment no. in order to see their results.
- Results are stored in MySQL database.
- Using the latest PHP technology completely built in HTML, CSS, PHP & MySQLi.

Social Media Android Studio:

- In this social media android studio, Developed a feature-rich social media application for Android that allows users to create profiles, post updates, follow other users, and interact through likes and comments.
- Profile management with options to edit profile details and upload profile pictures.
- Notification system to alert users of interactions.
- Programming Languages: Java, xml
